What's Your Function? ABA 101

This is a fun and full introduction to behavior analysis. Attendees will learn to approach behavior with evidence based practices to improve outcomes for individuals with Autism and related disabilities. They will explore the nuances of reinforcement and how to increase positive behaviors while also learning how to replace disruptive behaviors with skills. Last, attendees will apply this knowledge to support skill acquisition while also gaining confidence in establishing instructional control.

See You There!

- **When: September 25, 2020**
- **Where: Virtual Event (Zoom)**
- **Fee: Free**
- **Time: 8:30– 11:30**
- **Workshop #: 1667960**
